REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a gas diffusion structure for polymer electrolyte fuel cells comprising: a hydrophobic carbon substrate having two main opposing surfaces; a contact layer having a mixture of a hydrophobic polymer and carbon particles; wherein the carbon substrate is made hydrophobic by two layers of a hydrophobic polymer extending into said carbon substrate down to a depth of 5 to 40 microns and filling from 20 to 60% of the pore volume within said two layers.

The prior art, such as Kato U.S. Patent 6,127,059, teaches a gas diffusion layer comprising a carbon fiber woven cloth having a surface coating that penetrates no more than one-half the thickness of the cloth. The reference is silent to the coating filling 20 to 60% of the pores in the carbon substrate. Therefore, the subject invention is patentably distinct from Kato.

Conclusions

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
